

Shoulder Strap

Optimum comfort for carrying Notebook cases

DICOTA's shoulder strap ensures that Notebook cases are extremely comfortable to carry whilst on the move. Its extremely robust material and padding ensure that the shoulder strap is a valuable companion whilst on the move. This optional accessory can be attached to and used with the following DICOTA cases: DataBox Profile, DataBox Allround, DataBox Allround XL, as well as DataBox Allround XL Trolley. It can be easily attached to the case: first of all, the black protective caps on both sides need to be removed. Then the fastening clips can be screwed in there. The carry strap can then be fitted and the clasp pressed shut. Now nothing stands in the way of you comfortably carrying around a fully laden DICOTA case.
